## Method

- 1 Preheat the oven to gas mark 4/ 180°C/ 350°F.
- 2 Sift the flour, baking powder and cinnamon into a large bowl.
- 3 In a separate bowl whisk together the sugar, milk, egg and melted margarine.
- 4 With a large spoon, quickly fold the wet ingredients into the dry ones for about 15-20 seconds. The mixture will look lumpy and uneven at this stage but this is fine.
- 5 Lightly stir in the fruit. Then spoon the mixture into paper cases until they are  $\frac{3}{4}$  full.
- 6 Place on the top shelf of the oven and bake for about 15 minutes or until well risen and golden brown.
- 7 Remove from the tin and allow to cool on a wire rack.

\* These sugars are 'natural sugars', which occur in foods such as fruit. Although all sugars can cause tooth decay, fruit has many benefits. Try to restrict foods high in natural sugar to mealtimes only, and cut down on foods high in 'added sugar' such as sweets, cakes and biscuits.

## Handy Hints

- Try using different fruit e.g. chopped dates, dried apricots, dried cranberries, fresh or dried blueberries.
